Week #3

We found our client Dr. Jill Walsh, a professor for the Engineering Department. She would like us to create a mobile app for the American Society of Civil Engineers-ASCE conference 2019 at Saint Martin's University. In this app, will allow up to 700 users, students will be able to look up schedules, campus maps, room setting, and food options near as well as the university Cafeteria. It will also send out notifications prior to a session starting.
